Re: WLVA(AM), Lynchburg, Virginia
Facility Identification Number: 39579
Truth Broadcasting Corporation
Special Temporary Authority

Dear Counsel:

This is in reference to the request filed May 15, 2006, by Ann Bavender, Esq., on behalf of Truth Broadcasting Corporation ("TBC"). TBC requests extension of the special temporary authority ("STA") granted on November 15, 2005, to operate Station WLVA from a site other than the licensed site.¹ In support of the request, TBC states that the WLVA licensed transmitter site was sold for real estate development; that a minimum of 60 acres is needed for the WLVA facilities as currently licensed, and that despite considerable efforts, a suitable location has not yet been found. TBC requests extension of STA for operation with a long wire antenna until it can permanently relocate its facilities. Technical details are provided for the proposed STA operation.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond the licensee's control, and the licensee has taken all possible steps to expeditiously resolve the problem.

Our review indicates that the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

¹ WLVA is licensed for operation on 590 kHz with 5 kilowatts daytime and 1 kilowatt nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WLVA may continue to operate with the following facilities:

Coordinates:	37° 19' 06" NL. 79° 16' 37" WL (NAD 1927)
Frequency:	590 kHz
Operating hours:	Unlimited
Operating power:	Not to exceed 1.25 kW daytime and 0.25 kW nighttime
Antenna:	long wire

It will be necessary to further reduce power or cease operation if complaints of interference are received. TBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on **September 21, 2007**.

Sincerely,

A handwritten signature in black ink, appearing to read "Charles N. Miller", with a long horizontal flourish extending to the right.

Charles N. Miller, Engineer
